Education

- **High School Diploma**
  Colegiul Național Lucian Blaga
  Sep 2020 - Jun 2024
- **Bachelor**
  UBB Faculty of Economics and Business Administration
  Sep 2024 - Present

Skills

SwiftUI & SwiftData - Experienced

Flutter & Dart - Experienced

HTML & CSS - Experienced

Javascript - Beginner

Python - Beginner

Microsoft Excel - Beginner

AI-Augmented Engineering - Experienced

Summary

Academic Foundation: Currently pursuing a degree in Economics at **UBB FSEGA**, focusing on quantitative logic and data-driven decision-making.
AI-Augmented Engineering: Specialized in using **AI tools** and **Prompt Engineering** to develop cross-platform applications in **Swift** and **Dart**.
Proven Prototyping: Developed **Classlly**, an investor-validated mobile application using **Vision OCR** and **intelligent automation** to streamline user workflows.
Technical Versatility: Foundational proficiency in **Python** for exercises and computational logic, alongside web skills in **HTML/CSS** and **JS**.
Certified Expertise: Professional credentials in **Business Analysis**, **Google Ads**, and **Social Media Marketing**.

Work Experience

i_lab Incubator Program , UBB Student i_lab (Internship), Cluj-Napoca

October 2025 - December 2025

Product-Market Fit: Mentored by business leaders to define growth strategies and validate product hypotheses for market readiness.
Stakeholder Pitching: Successfully presented technical prototypes during Demo Day, incorporating investor feedback to pivot from a personal tool to an analytics-focused product.
Business Analysis: Applied economic reasoning to technical workflows, to develop the product.

Lead Developer (AI-Augmented Engineering), Independent Projects (Self-Employed)

September 2025 - Present

Built "Classlly" (iOS App): Created a mobile dashboard for students using **SwiftUI** and **SwiftData** to handle class schedules and tasks offline.
Added AI Features: Integrated **Vision OCR** so users can scan paper schedules and used **Google Generative AI** to provide smart suggestions inside the app.
Designed Economic Tools: Built a "What-If" calculator that helps students plan their time and see the results of different schedule changes.
Developed "Foodify" (Web): Built a recipe website from scratch using **HTML, CSS, and JavaScript**, including a custom theme system.
AI-Augmented Workflow: Used AI coding tools to build these projects much faster than traditional methods, while still managing all the logic and design myself.

Social Media Marketing , HP

Hobbies

Physical Discipline & Conditioning: Regularly active in **gym workouts** and **cycling**. These activities build the endurance and mental focus I need to manage long-term technical projects and maintain high energy levels.
Strategic Problem-Solving: Enthusiast of **Chess** and speed-solving the **Rubik's Cube**. These hobbies sharpen my pattern recognition, logical reasoning, and "first-principles" thinking—skills I use daily in software architecture and economic analysis.
Continuous Learning & Research: Dedicated to **reading** and researching new digital tools and interesting facts. I stay at the forefront of **AI-augmented engineering** by constantly investigating new technologies and workflows that improve my development speed.
